MEDIA TECHNOLOGY

CONNECT Wallplate System 45x45

Data and communication

Connection technology for standard switch ranges

The connection modules in the format 45x45 mm find more and more applications in the functional building. It is a French format for switches / sockets. Due to the very quick and easy installation you will find this module in Germany and in other countries for installation in underfloor systems, cable ducts, room columns, etc.

- Very cost-effective modules because all connections are mounted directly in the module
- Very fast „click“ mounting in the corresponding fixtures
- Color variants pure white matt and anthracite matt available
- Combination of media technology, network technology and electrical connections possible
- Suitable accessories for all installation variants available

Soldering

open cable end in an installation box / cable duct

Front:

Plug connection, plug-in system according to the specification of the connection box

Advantage:

very small installation depth and space requirement

Back:

Solder connection, pin assignment is enclosed with each module

Disadvantage:

time-consuming installation, often difficult to access in the case of inaccessible junction boxes

Plug / Screw

open cable end in an installation box / cable duct

Front:

Plug connection, plug-in system according to the specification of the connection box

Advantage:

low installation depth, little space required, compared to solder connections much better to handle because the cable ends are occupied with the terminals and then only plugged

Back:

Long-time proven system with pluggable terminals, pin assignment is included with each module

Disadvantage:

more expensive compared to other systems, limitation of high-frequency signals (eg HDMI 1080P Full HD signal possible up to 20m, UHD 4K only possible for short cable paths up to 3m)

Gender Changer

Cable end with plug

Front:

Plug connection, plug-in system according to the specification of the connection box

Back:

Plug connection as front side, partly also with angled cable outlet possible

Advantage:

fast installation by plugging the components, cost effective variant

Disadvantage:

large installation depth necessary, usually only possible in cavity wall installations

Cable

Cable end with plug

Front:

Plug connection, plug-in system according to the specification of the connection box

Back:

Plug-in connection with cable whip, socket / socket or socket / plug available, different cable lengths available

Advantage:

more flexible installation compared to Gender Changer, the cable end can be installed in any direction, easy to install by double-sided plugging

Disadvantage:

depending on the system large installation depth necessary

Cable connection with lateral cable outlet

Cable end with plug

Front:

Plug connection, plug-in system according to the specification of the connection box

Back:

Plug-in connection with cable whip, socket / socket or socket / plug available, different cable lengths available, compared with straight version reduced installation depth, ideally suited for cable channels

Advantage:

like cable connection straight, but with reduced installation depth

Disadvantage:

slightly less bandwidth / transmission length compared to straight cable outlets possible

Installation with Keystone modules

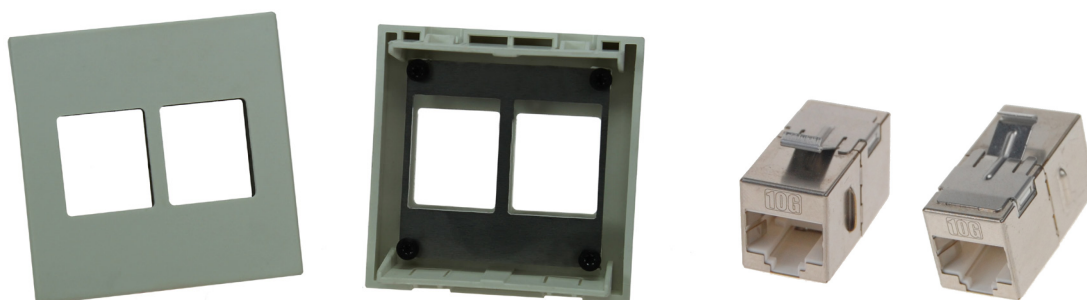

Cable end with connector / Keystone installation box with one or two slots

Advantage:

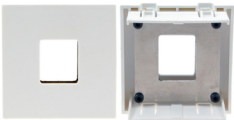

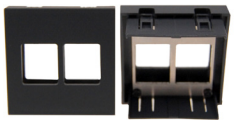

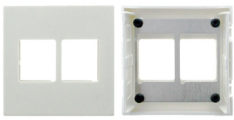

over 200 Keystone variants available, changeable at any time, variants with soldering, screw, plug and cable versions, for connections that are often plugged in easy change of modules possible

Disadvantage:

none

45x45 Blind + Keystone

electronic components GmbH

MEDIA TECHNOLOGY

CONTROL

Proprietary developments for simple and affordable media solutions

SIGNAL MANAGEMENT

Signal transmission (HDBaseT), switch, distribute or convert, Rextron provides the right solution

CABLE SOLUTIONS

Connection cables for the professional user, stock goods and special solutions which fit on your needs

CONNECT

Connectors, adapters, keystone adapters, D-Hole, for every application the right connection

INSTALL

perfect installation solutions for floor, table, supply columns and ceiling

CUSTOMIZING

Proprietary development for simple and affordable media solutions
